Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

The claims are directed to 4 independent and distinct nucleic acid sequences of SEQ ID NO: 4, 6, 8 and 12 and their corresponding amino acids of SEQ ID NO: 5, 7, 9 and 13. Applicant is required to elect a single amino acid of SEQ ID NO: 5, 7, 9 or 13 and the corresponding polynucleotide coding said sequence of either SEQ ID NO: 4, 6, 8 or 12. This requirement is not to be construed as a requirement for an election of species, since each of the nucleic acid sequences or amino acid sequences recited in alternative form is not a member of a single structurally and functionally related genus, but rather constitutes an independent and patentably distinct invention. Separate searches and considerations would be required for examination of each of the nucleic acid sequences.

The inventions listed as Groups I-XI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical feature of a polynucleotide encoding an aromatic amino acid decarboxylase was taught in the art; Guillet G., et al. Plant Physiology, March 2000; Vol. 122, pp. 933-943 teach an expression cassette comprising a polynucleotide encoding an aromatic amino acid decarboxylase and a plant transformed therewith and a method thereof (see abstract).

Art Unit: 1638

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
